

Led Light

Create the best possible environment for a successful hunting of wild pigs around your feeder. The ledlight from Nordic Gamekeeper brings light to the feeding place. From the app in your Smartphone you can control and steer when the light should be on, the length of the lighting time and the power of the light. These variables all save battery for you.

Assembly:

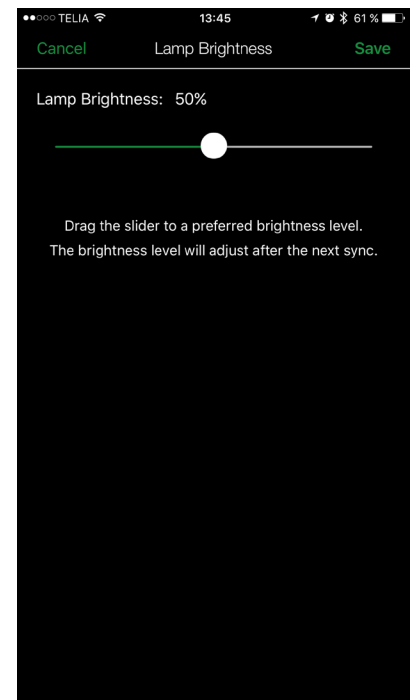

1. Mount the ledlight on/around the feeder in an suitable way.
2. Pull the cable to FeedCon.
3. Connect red cable to + lamp input in FeedCon
4. Connect black cable to - lamp input in FeedCon

Activate the Led Light in the app:

1. Select the feeder you have installed the Led Light on
2. Choose: Alternativ
3. Choose: schedule
4. Add schedul
5. Choose "normal time" or Astro Time"
6. Choose Lamp
7. Follow from here the instructions in the app and "save"

Regulate the strength of the LED light in the app:

1. Select the feeder you have mounted the Led Light on
2. Select options
3. Select Settings
4. Select configuration
5. Select lamp brightness
6. Drag the slider to a preferred brightness leve
7. Press to save

The brightness will be updated at the next synchronization time.
